

EXCITING NEW INFLATABLE RANGE FOR 2009

Imagine a 5.5m or 4m square tent structure that can be transported in its own rucksack by one man (on foot, on a bicycle, motorcycle or small sports car!), and erected in less than ten minutes; that can be used on ski slopes or on the beach, hard or soft ground; that looks stunning and can be digitally branded to make a powerful marketing statement; that has been tested in winds up to 70 km/h; and that once inflated, needs no compressor to keep it up. The Vision One Welcome Tent range does all these things, and is available today from Instant Marquees.

SIZE & WEIGHT	Large 4m	Extra Large 5.5m
Welcome Tent Dacron	16kgs	24kgs
Welcome Tent Ultralight	12.5kgs	19kgs
